KAROL BRENNAN

Front End Developer

EXPERIENCE

Front End Developer
07/2017 - Current
Canpango

Lead front-end engineering effort of a ReactJS based account management app.
> Salesforce integration eliminates approx. $6,000/month in license fees upon January 2018 launch.
> Conducted code reviews and mentored a junior level developer on the team.

ReactJS, JavaScript, JSX, REST API, Bootstrap, Git

Web Designer
02/2017 - 07/2017
International Foundation of Employee Benefit Plans

Developed a shared CSS library to maintain consistency across site forms.
> Redesigned jobsinbenefits.org while maintaining a seamless integration with the existing site.
> Developed and implemented a variety of user interfaces across multiple sites.
> Re-wrote the HTML structure and redesigned the annual benefits conference session selection application. Ensured semantic code, and responsive design.

JavaScript, HTML5, CSS3, Responsive Web Design, Adobe Creative Cloud

Web Developer
10/2015 - 02/2017

Web Designer
08/2013 - 10/2015
Liturgical Publications

Developed new features and provided support for LPI's suite of products.
> Re-engineered the theme development process and file structure for weconnect.com which reduced the necessary lines of code per theme from thousands to hundreds and cut new theme development time by 75%.
> Developed a system to consume Google's JavaScript API data to provide geolocation services for parishesonline.com and ourseniorcenter.com
> Managed the development team's support queue. Patched and deployed bug fixes for existing applications. Delegated other tasks as needed.
> Designed and implemented a variety of layouts and user interfaces across a suite of products geared towards churches and senior centers.
> Created complementary mobile UIs for legacy themes and refactored themes to be responsive.

JavaScript, Google JavaScript API, Foundation, PHP, Zend Framework 1, Git, Vagrant, Ansible, MySQL

Web Designer
09/2012 - 08/2013
PowerSports Network

Mentored colleagues in current HTML and CSS technologies.
